AMENDMENT

In response to the Office Action mailed on May 19, 1999,
please amend the subject application as is set forth below.

In the Claims

1. (Twice Amended) An image pickup system comprising:

an image pickup apparatus including an image sensor for
photo-electrically converting a [pickup-up] picked-up object image
into an electrical signal, a video signal generating part for
forming a video signal from the electrical signal, a color space
converting part having a plurality of predetermined, diverse color
spaces selectable therein for converting a color space of the video
signal, and an interface part for externally transferring the
video signal; and

a control part for controlling said image pickup
apparatus through said interface part,
